

EVM Universe Tracker Index (EVMU)

As on 24th Feb 2022

BlockBelly
DRAFT

Description

EVM Universe Tracker Index (EVMU) is an index that tracks quality crypto token projects that are primarily focused for the Ethereum and EVM ecosystem.. As one of the leading onchains in Crypto and Web3, EVM projects focus on next-generation applications and infrastructure being built in decentralised technology and Web3

Methodology

The following criteria have been considered in the methodology and evaluation:

- Tokens have been listed for at least 6 months
- Tokens hold a marketCap of > \$350M
- Tokens offer an average daily on volume of > \$20K on a decentralised exchange*
- Tokens are not wrapped tokens
- The weightage between tokens is > \$100B is at least 20%
- The weightage between remainder tokens is calculated based on weightage of market cap and liquidity on exchanges
- Tokens closely track or a part of Ethereum's ecosystem
- Tokens would be rebalanced quarterly
